Source: Independent NAVs are calculated daily by Frostrow Capital LLP (by Apex Listed Companies Services (UK) Limited pre 31.12.24). From January 2021 Total Return performance details shown are net NAV to NAV returns (including current financial year revenue items) with gross dividends re-invested. Prior to January 2021 Total Return performance details shown were net NAV to NAV returns (excluding current financial year revenue items) with gross dividends re-invested. Ordinary Share Price period returns displayed are calculated as Total Return on a Last price to Last price basis. Past performance may not be a reliable guide to future performance. The price of investments and the income from them may fall as well as rise and investors may not get back the full amount invested. All figures are in GBP or sterling adjusted based on a midday FX rate consistent with the valuation point. Inception date 15 December 2015. Investments denominated in foreign currencies expose investors to the risk of loss from currency movements as well as movements in the value, price or income derived from the investments themselves and some of the investments referred to herein may be derivatives or other products which may involve different and more complex risks as compared to listed securities.

Commentary

During January, the NAV per share of CC Japan Income & Growth Trust rose 5.04%, whilst the share price returned 4.99% and the Topix TR Index increased 3.99%, (all returns on a total return, sterling adjusted basis) as Japanese equities continued their strong recent performance. Favourable sentiment towards technology related companies globally and rising expectations for the domestic economy, following Prime Minister Sanae Takaichi's decision to call a general election, were the main drivers. The market gains were tempered by Yen strength towards the end of the month in response to suggestions that monetary authorities were considering action to address the recent speculative weakness of the Japanese currency.

Surveys suggest that the pace of inflation is the most significant domestic issue for voters and policies to redress the consequent cost of living challenges have featured prominently in election proposals from the competing candidates. All have suggested some form of reduction in the consumption tax, differing in scope, duration and funding, to address the sluggish consumption trends that have been a stubborn headwind to economic growth. The ruling coalition appears to be in a strong position to win the election being held on 8 February, on the back of high approval ratings for PM Takaichi and favourable expectations for the government to push ahead with the growth strategies promoted by the Prime Minister.

We are encouraged by the Prime Minister's previous suggestions that she would look to encourage companies to appropriately distribute resources and believe that the 2026 revision of Japan's Corporate Governance Code will align closely with her agenda. Specifically, we expect the revisions to promote greater allocation of resources to growth sectors and human capital, as well as enhancing capital returns through balance sheet optimization. Executed successfully, we believe that such moves will significantly enhance the growth prospects of individual companies and their valuations.

The top contributor to performance during the month was Noritsu Koki, which is a good example of these developments in action. Consistent with its established corporate strategy, the company announced the acquisition of Senqcia, a leading manufacturer of building materials, utilising cash on its balance sheet as well as its access to external financing to transact a deal which will enhance both its medium-term growth prospects and its return on equity.

Key Risks

Liquidity risk – The Company may encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity.

Credit and counterparty risks – the Company may be exposed to credit and counterparty risks in relation to the securities and counterparties it invests in and with whom it transacts.

Concentration risk – The Company holds a limited number of investments. If one of these falls in value, it can have a greater impact on the Company's value than if the Company held a larger number of investments.

Currency risk – Investing in assets in a currency other than your own exposes the value of your investment to exchange rate fluctuations.

Derivatives – the Company may use derivatives as investments or to manage the risk profile of the Company. Their use may increase the risk of losses as well as enhance potential gains as compared to funds that do not use derivatives.

Sustainability Risk - Environmental, social and governance events or conditions could occur that have an adverse impact on the value of the Fund's investments, either directly, or by contributing to the impact or materiality of other risks.

The Company's prospectus gives you further details about all the risks for this investment trust – see under "Important Information" for how to obtain a copy.

Target Market - The Company is suitable for investors seeking an investment that aims to deliver total returns over the longer term (at least five years), is compatible with the needs for retail clients, professional clients and eligible counterparties, and is eligible for all distribution channels. The Company may not be suitable for investors who are concerned about short-term volatility and performance, have low or no risk tolerance or are looking for capital protection, who are seeking a guaranteed or regular income, or a predictable return profile. The Company does not offer capital protection.

Value Assessment - The AIFM has conducted an annual Value Assessment on the Company in line with Financial Conduct Authority (FCA) rules set out in the Consumer Duty regulation. The Assessment focuses on the nature of the product, including benefits received and its quality, limitations that are part of the product, expected total costs to clients and target market considerations. Within this, the assessment considers quality of services, performance of the Company (against both benchmark and peers), total fees (including management fees and entry and exit fees as applicable to the Company), and also considers whether vulnerable consumers are able to receive fair value from the product.

Chikara Investments LLP, as AIFM prior to 1 January 2025, concluded that the Company is providing value based on the above assessment.

Important Information

The Key Information Document and the latest Annual Report of the Company are available on the Company's website: www.ccjapanincomeandgrowthtrust.com. All data as at 31.01.2026 unless stated otherwise.

This factsheet is to provide you summary information about the Company and should not be taken as advice or a recommendation to buy or sell its shares. If you are unsure of the suitability of this product for your investment needs, please contact a financial adviser. The value of the Company's ordinary shares will fluctuate. The price of the ordinary shares in the Company is determined by market supply and demand. The price of the ordinary shares may be different to the net assets of the Company.

The Company may enter into long only contracts for difference or equity swaps for gearing and efficient portfolio management purposes. It may also use borrowing to seek to enhance investment returns. This will exaggerate market movements both up and down. Generally gearing, through borrowings and/or entering into long only contracts for difference or equity swaps, will not exceed the net asset value by more than 20% at the time of drawdown of the relevant borrowings or entering into the relevant transaction, as appropriate. Where the Company utilises such instruments, it is likely to take a credit risk with regard to the parties with whom it trades and may also bear the risk of settlement default.

Past performance is no guarantee of future performance. You should note that your capital is at risk with this investment, and you may get back less than you invested. All information and research material provided herein is subject to change and this document does not purport to

provide a complete description of the funds, securities or other investments or markets referred to or the performance thereof. All expressions of opinion are subject to change without notice.

Shareholders should read the Company's product documentation before investing, including the latest Report and Accounts, the Alternative Investment Fund Managers Directive Disclosure Document and the latest prospectus and Annual Report of the Company as they contain important information regarding the Company, including charges, tax and specific risk warnings and will form the basis of the investment.
