Source: Independent NAVs are calculated daily by Frostrow Capital LLP (by Apex Listed Companies Services (UK) Limited pre 31.12.24). From January 2021 Total Return performance details shown are net NAV to NAV returns (including current financial year revenue items) with gross dividends re-invested. Prior to January 2021 Total Return performance details shown were net NAV to NAV returns (excluding current financial year revenue items) with gross dividends re-invested. Ordinary Share Price period returns displayed are calculated as Total Return on a Last price to Last price basis. Past performance may not be a reliable guide to future performance. The price of investments and the income from them may fall as well as rise and investors may not get back the full amount invested. All figures are in GBP or sterling adjusted based on a midday FX rate consistent with the valuation point. Inception date 15 December 2015. Investments denominated in foreign currencies expose investors to the risk of loss from currency movements as well as movements in the value, price or income derived from the investments themselves and some of the investments referred to herein may be derivatives or other products which may involve different and more complex risks as compared to listed securities.

Commentary

During November, the NAV per share of the Chikara Japan Income & Growth Trust rose 0.5%, whilst the share price total return was up 0.68% and the Topix TR Index was down -0.50%, on a net total return, sterling adjusted basis. There was a notable reversal of the market concentration of the previous two months with momentum behind the sharp rally of AI related stocks such as Softbank Group receding.

The interim earnings season has seen a generally robust performance with aggregate data for sales and operating profit growth revised upwards. These have been boosted in part by a lower impact from US tariffs and favourable currency translation. Results in the banking sector were also strong and accompanied in some cases by increases in projected shareholder returns which reconfirms the favourable operating environment in this industry currently. Sumitomo Mitsui Financial Group revised up its dividend from Y136 for the full year to Y157, representing an annual rise of 28.6% from the previous year. Additionally, the company announced a share buyback of up to 50m shares or 1.3% of outstanding total of issued shares. Mitsubishi UFJ Holdings similarly increased the FY25 dividend from Y70 to Y74, which will be an annual increase of 15.6%. This was accompanied by a new buyback of up to 130m shares or 1.0% of the total shares. The portfolio's final holding in the sector, Sumitomo Mitsui Trust Holdings, increased its full year dividend projection to Y170 for a 9.7% yearly gain and revealed a buyback programme for up to 11m shares equivalent to 1.6%. Alongside favourable operating results at the interim stage, portfolio holdings Fujikura, Nintendo, Itochu and Megachips also raised their fiscal year dividend projections. Consensus estimates for the dividend growth for the market have risen to +10% y/y.

Nomura Securities report that the total of share buybacks announced in calendar year 2025 to the end of November is Y17.6trn, up from the Y16.6trn over the same 11-month period in 2024. This amount marks a new record and is consistent with the trends highlighted previously encouraged by initiatives such as the Corporate Governance Code (the "Code").

The Code is scheduled to be revised during 2026 and is widely expected to seek greater accountability on the appropriateness of resource allocation with particular emphasis on cash and deposits. The Nomura report also highlights that M&A tender offers for the 2025 to date have been Y13.8trn, significantly higher than previous years (Y4.2trn FY24), suggesting that many companies are reacting in anticipation of the changes.

Key Risks

Liquidity risk – The Company may encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity.

Credit and counterparty risks – the Company may be exposed to credit and counterparty risks in relation to the securities and counterparties it invests in and with whom it transacts.

Concentration risk – The Company holds a limited number of investments. If one of these falls in value, it can have a greater impact on the Company's value than if the Company held a larger number of investments.

Currency risk – Investing in assets in a currency other than your own exposes the value of your investment to exchange rate fluctuations.

Derivatives – the Company may use derivatives as investments or to manage the risk profile of the Company. Their use may increase the risk of losses as well as enhance potential gains as compared to funds that do not use derivatives.

Sustainability Risk - Environmental, social and governance events or conditions could occur that have an adverse impact on the value of the Fund's investments, either directly, or by contributing to the impact or materiality of other risks.

The Company's prospectus gives you further details about all the risks for this investment trust – see under "Important Information" for how to obtain a copy.

Target Market - The Company is suitable for investors seeking an investment that aims to deliver total returns over the longer term (at least five years), is compatible with the needs for retail clients, professional clients and eligible counterparties, and is eligible for all distribution channels. The Company may not be suitable for investors who are concerned about short-term volatility and performance, have low or no risk tolerance or are looking for capital protection, who are seeking a guaranteed or regular income, or a predictable return profile. The Company does not offer capital protection.

Value Assessment -The AIFM has conducted an annual Value Assessment on the Company in line with Financial Conduct Authority (FCA) rules set out in the Consumer Duty regulation. The Assessment focuses on the nature of the product, including benefits received and its quality, limitations that are part of the product, expected total costs to clients and target market considerations. Within this, the assessment considers quality of services, performance of the Company (against both benchmark and peers), total fees (including management fees and entry and exit fees as applicable to the Company), and also considers whether vulnerable consumers are able to receive fair value from the product.

Chikara Investments LLP, as AIFM prior to 1 January 2025, concluded that the Company is providing value based on the above assessment.

Important Information

The Key Information Document and the latest Annual Report of the Company are available on the Company's website: www.ccjapanincomeandgrowthtrust.com. All data as at 30.11.2025 unless stated otherwise.

This factsheet is to provide you summary information about the Company and should not be taken as advice or a recommendation to buy or sell its shares. If you are unsure of the suitability of this product for your investment needs, please contact a financial adviser. The value of the Company's ordinary shares will fluctuate. The price of the ordinary shares in the Company is determined by market supply and demand. The price of the ordinary shares may be different to the net assets of the Company.

The Company may enter into long only contracts for difference or equity swaps for gearing and efficient portfolio management purposes. It may also use borrowing to seek to enhance investment returns. This will exaggerate market movements both up and down. Generally gearing, through borrowings and/or entering into long only contracts for difference or equity swaps, will not exceed the net asset value by more than 20% at the time of drawdown of the relevant borrowings or entering into the relevant transaction, as appropriate. Where the Company utilises such instruments, it is likely to take a credit risk with regard to the parties with whom it trades and may also bear the risk of settlement default.

Past performance is no guarantee of future performance. You should note that your capital is at risk with this investment, and you may get back less than you invested. All information and research material provided herein is subject to change and this document does not purport to provide a complete description of the funds, securities or other investments or markets referred to or the performance thereof. All expressions of opinion are subject to change without notice.

Shareholders should read the Company's product documentation before investing, including the latest Report and Accounts, the Alternative Investment Fund Managers Directive Disclosure Document and the latest prospectus and Annual Report of the Company as they contain important information regarding the Company, including charges, tax and specific risk warnings and will form the basis of the investment.
